

Technology Recruitment

Who I am

Stuart Campbell

Director - Head of Scotland
T: +44 (0)131 370 6601
E: scampbell@mcgregor-boyall.com
W: mcgregor-boyall.com

Stuart has 20-years' experience in the Scottish tech recruitment sector where he has predominantly specialised in advanced infrastructure, development and automation technologies. With a successful track record across a range of talent-based solutions he's equally comfortable headhunting niche permanent talent, providing a consultancy solution or utilising his highly qualified network of top Scottish contractors. Always able to provide an honest assessment on market availability, Stuart has always been trusted by his varied client base to deliver the required solution on time and in budget.

What we do in Scotland

Our talented team of experienced consultants provide SME knowledge to our clients in the software development, advanced infrastructure, devops / automation, testing and business transformation markets. As well as typically permanent and contract recruitment, we also have in-depth experience delivering exclusive, retained headhunts, project hiring and consultancy / staff augmentation. With the average recruitment sector tenure of the Scotland team of c. 10yrs you can be confident you're always dealing with an experienced consultant. We regularly secure repeat business and top supplier status as we are committed to delivering results even on the most challenging project or search.

Who we work with

Standard Life Aberdeen
Barclays
Citigroup
Sky

Morgan Stanley
Lumira DX
JP Morgan
Lloyds

Recent testimonials...

Senior Software Engineer, Software Company

Stuart helped me find, prepare and apply for my current position as a software engineer in financial technology. In my own case, where I was transitioning from academic research to a professional setting, Stuart was encouraging, kind, and supportive throughout the entire process. We established excellent rapport through Stuart's open and transparent way of communicating as well as through our shared background in science and engineering. I have confidence in Stuart's knowledge and experience, and I have taken to heart his insightful advice for the near and long-term future.

Principal Architect, Technology Services

Stuart is a highly experienced and extremely professional recruitment consultant who I highly recommend. He has gained an excellent understanding of both the clients and candidates needs. As a candidate I used Stuart's services to discretely look for opportunities for me within the Scottish BI/DW industry. He understood that it had to be the right position and company. He worked on my requirements and never gave up in finding this position for me which I accepted in January this year. Thanks Stuart your tenacity and professionalism does you're your company credit.

Programme Director, Consultancy

Stuart has gone the extra mile more times than I care to recall. His depth of knowledge of the marketplace and his passion for excellent service provision allows me to wholeheartedly recommend him to anyone who needs quality resourcing.
